

### How To Determine Compatibility

Bennett Lenco-to-BOLT Upgrade Kit is compatible with Lenco "Standard Mount", "Standard Performance", and "Edge Mount" systems.

To determine whether or not your Lenco actuators meet the Compatibility requirements, locate the identification stamp (available since approximately May 2008). The actuator type is indicated by the second number in the 5-digit code.

Lenco actuators with either "A", "B" or "G" indicated as the second digit in the 5-digit code sequence are compatible with the Bennett Lenco-to-BOLT Upgrade Kit.

Short stroke Lenco actuators (11-3/8" and 10-7/8" actuator length), and long stroke Lenco actuators (14" and 13" actuator length) are NOT compatible.
